About DGFASLI and RLI Faridabad

DGFASLI is an attached office of the Ministry of Labour & Employment, Government of India and serves as a technical arm to assist the Ministry in formulating national policies on occupational safety and health in factories and docks. Regional Labour Institute (RLI) at Faridabad is a subordinate office under the DGFASLI and caters to occupational safety and health in factories.

Programme Preamble

Hazard Identification and Risk Assessment (HIRA) is a systematic process crucial for managing risks in industries dealing with hazardous processes. The main goal of HIRA is to identify potential hazards, evaluate the risks associated with those hazards, and implement appropriate measures to mitigate or eliminate the risks to ensure the safety and health of workers. This programme aims to provide participants with a comprehensive understanding of the methods and tools used in hazard identification and risk assessment, specifically tailored for hazardous processes.

Objective

The primary objective of this program is to provide participants with the knowledge and skills required to effectively identify hazards and assess risks associated with hazardous processes, enabling them to implement appropriate risk mitigation strategies. The program focuses on understanding hazardous processes, utilizing various hazard identification techniques, applying qualitative and quantitative risk assessment methodologies, and developing effective control measures to minimize risks. By equipping participants with practical tools and techniques, the program aims to enhance workplace safety, improve compliance with regulatory standards, and foster a culture of proactive risk management in hazardous process industries.

Course Highlight

- Introduction to National Policy on Safety, Health & Environment
- Learn various techniques, including HAZOP and FMEA, to effectively identify hazards in hazardous processes.
- Develop and implement effective control measures to manage and mitigate risks in hazardous environments.
- Engage in workshops, group exercises, and simulations to gain hands-on experience in hazard identification and risk management
