About DGFASLI
DGFASLI is an attached office of the Ministry of Labour & Employment, Government of India and serves as a technical arm to assist the Ministry in formulating national policies on occupational safety and health in factories and docks. It also advises factories on various problems concerning safety, health, efficiency and well-being of the persons at work places.

Background
Materials handling is the preparation, placing and positioning of materials to facilitate their movement and storage. It adds to the cost of product. It accounts for 36% of Production costs. Nearly 20-50 tons of Materials are handled and re-handled for every 1 ton of finished product. About 20-80% of total manufacturing costs go to the wages of the employees engaged in materials handling. About 2/3 of manufacturing cycle time is spent on handling and 30% of all industrial accidents are due to material handling.

There are limitations for manual lifting of material and hence for efficient and fast movement of materials in different working conditions, the use of lifting Machines and accessory gears are essential. It is very important to identify a correct lifting appliance for handling of various types of materials in industries, construction sites and port sector. At the same time selection and application of accessory gears are also plays a vital role in efficient handling of materials. Improper selection of lifting appliances and accessory gears for handling of material cause failure of equipments and gears resulting in to a major injuries, damage to the property, material to be handled and equipments used. In addition, workers can be injured by falling objects, improperly stacked materials, or by various types of equipments.

Therefore, Central Labour Institute, DGFASLI Mumbai is providing online training platform for Intended participants to learn from their own place using mobile phone/laptop/desktop (with webcam, microphone & speaker) in view of COVID-19 pandemic situation/preventive measures.
