

DIRECTORATE GENERAL FACTORY ADVICE SERVICE AND LABOUR INSTITUTES

Ministry of Labour and Employment, Government of India

03 days Training Programme on “Safety Engineering and Management” from 19 -21 Jan, 2023 CENTRAL LABOUR INSTITUTE, MUMBAI

About DGFASLI

DGFASLI is an attached office of the Ministry of Labour & Employment, Government of India and serves as a technical arm to assist the Ministry in formulating national policies on occupational safety and health (OSH) in factories and docks. It also advises factories on various problems concerning safety, health, efficiency and well - being of the persons at workplaces.

Background

Safety engineering is a multidisciplinary field where scientific and engineering principles and methods are applied to assess and eliminate hazards. Every day, we hear of serious injuries and fatalities involving buildings, vehicles, machines, equipment, products etc.. Many of these incidents could have been prevented with safety-engineering interventions.

In a competitive environment any management would like to have more profit and higher productivity not only for their survival but also for their growth. The company executives including the operating personnel want to be assured that their organization is well managed and the losses are controlled and minimized. A Safety Management System is a comprehensive and integrated system that ensures that all work at the facility is conducted safely

Considering all these, it is imperative that safety management systems should be coupled with sound safety engineering interventions to prevent accidents and occupational diseases in an organization. This three days training programme will provide knowledge to the participants on above aspects.

Programme Highlights

- OSH Legal frame work
- Accident causation theories, Accident reporting, Investigation and Analysis
- Mechanical hazards and machine safeguarding
- Industrial Hygiene and confined space safety
- Ventilation and Heat stress
- Noise and Vibrations Hazards and its control
